Guiding System

Pre-settings for most machines for accurate needle position.
 "Decal" calibration for quick attachment of coloured sticky tape guides for specific jobs.

Double tracks used by left hand, help achieve speed & accuracy without danger.

Réf : 578 Sew Easy

Guide pour coutures droites qui se visse facilement sur le plateau de toutes les machines. Le constructeur met en avant lors de ses démonstrations que "Simple is best"! Ce guide, constitué d'une plaque de métal, présente par endroit des lignes droites embouties qui forment comme une rainure au fond de laquelle une très légère pression d'un doigt facilite le maintien des épaisseurs de tissus à coudre.

Ref : 578 Sew Easy

The Sew Easy is a simple guiding system that can be attached quickly to any sewing machine. It is a carefully crafted thin metal plate on which smooth raised guide tracks, in exactly the ideal positions in relation to the needle, form accurate sewing guides. To use Sew Easy simply apply fingertip pressure through the material and allow it to glide in an accurate straight sewing line following the tip of the guide tracks.
